PROFESSIONAL PROFILE

Being a software engineer, I enjoy translating business needs into robust and integrated technology solutions. I love working in fast-paced environments solving unique and challenging tech problems and developing innovative solutions. Tinkering with new technologies is my passion. With a track record of developing successful project implementations in multi-domains, I have been involved in technical designs, code development, application architecture, code review.

Be sure to check out my website chandujs.dev for some of the work I've done.
